Vote of the Partition law. To the Honorable the members of the House and the legislative Council. GENTLEMEN:

I return without my approval Senate Bill No. 7, being an Act to repeal an Act relating to partition of Real Estate and for other purposes approved January 14, 1876.

In my Julgement, it is very necessary to have law upon this subject as the Territory becomes more thickly settled, lands will become more valuable and will be held in smaller quantities. To make sales and to be able to give you titles and certain and easy possession, it will be necessary to have district boundaries There is always great liability to confusion in unfixed ownership In the earliest days, when but few familes were settled upon the e grounds there was comparatively fittle difficulty, but now, with increased population and the incoming of strangers there is increased confusion, and it is for the public good that these large grounds be divided and the right and ownership of individuals determined. This law is copied from a law of a sister state and I have reason to believe that it is a very good law. but I shall be willing to favor any amendment by which it can be improv ed, but am not wilting to have it entirely repealed I cannot therefore approve the bill.

S. B. AXTELL. Governor of N. Mexico.

We are indebted to Hon, W. G. Ritch for a copy of a bill introduced into the legislature entitled "An act to provide for the incorporation of Railroad Companies and the management of the affairs thereof and other matters relating thereto." It is a general incorporation act allowing five or more persons to associate themselves together for the purpose of constructing and operating railroads in this Territory. Its provisions are particular in all details which makes the bill extensive. It provides as a means of encouragement to organize companies and build railroads that the property of the company shall be exempt from taxation for a period of six years, Such a provision we believe proper for a limited time as encouragement to improvements of such andoubted public utility as railroads It takes immense capital to build them through the extensive unsettled regions of the west and for a number of years the incorporators can not hope to receive a return for their ed. investment. They bring much wealth into the Territory, largely increase the value of property and stimulate every branch of industry and for these reasons should be favored until they can get the road in running order and traffic established. The bill is a good one and should be passed.

work well in the sleepy atmosphere of the ancient capital. His daily is very irregular in its arrival in this city. It does not come as many times by "a large majority" as there are days in the week. Hence we conclude that the conditions are bad at ; Santa Fe for the proper manifestations, and that the old town is a kind of sleepy hollowso permented with the spirit of laziness that it has communicated an grambitious feeling to our otherwise restless and energetic res presentative. The surrounding influences are too slothful for one spirit to combat and so he must succua b.

them as I find them here as elsewhere, as I could never leave Santa Fe without giving my opinion of the men who are at the head of the civil affairs of the State. First there is Governor S. B. Axtell. Governor Axtell was appointed to the positition he now occupies in 1875 and has thus been here over two years. He is a man somewhat advanced in years. He wears a clean shaved face which shows many marks of care. His appearance is that of a man of thought and determination. And he does not deceive his appearance. Being a progressive man and a man loyal to his country, it is most trying to him to see the Legislature trampling down the good laws which have been made enacting others that should not be permitted for the good of the people, and violating the statutory laws of the United States, Governor Axtell was once a representative in Congress from California, and was Gov. ernor of Utah before becoming Governor of New Mexico, He has thus had long experience, and his counsel is such as should be headed by the law makers of this Territory, Governor Axtell has an able assist tant in the Territorial Secretary, Hon W. G. Ritch, Mr Ritch has been in New Mexico over five years, and has during this time become the best informed man upon the resources of the Territory to be found within its borders. He is a close student and a very hard worker; a man who take naturally to literary work, He is also a man of strong courage and good judgment. Since coming to the Territory Mr. Ritch has acted as Governor about a year, and he occupied the gubernatorial chair with the dignity that is natural to him Mr. Ritch has his family, consisting of a wife, two daughters and a son, with him in New Mex ico. who are smong the brightest adornments of Santa Fe society.
